EMORINKEN SAMUEL

Software Engineer

SUMMARY

Creative, detail-oriented, software engineer with a deep interest in AI. Proven track record of creating and implementing successful front and back end web applications. Looking to bring my skills to a tech company.

WORK EXPERIENCE

Software Engineer at 100devs

October 2021— Present

- Collaborated with a team of developers to build modern and responsive web applications using best practices
- Built semantically structured full stack web applications

Recent Projects:

Fc Barcelona Players info generator- This is a full stack web app that takes input of FC Barcelona players names and generates their respective details. The server side code was written on NodeJs with the framework ExpressJs while the client side code was with Vanilla JavaScript, Html and CSS.

Tenzies Game- this is a game of die built solely with the JavaScript library ReactJS. The objective of the game is to roll the dice as fast as possible and get all dice on the same number

Tip Calclulator- The Tip Calculator calculates tip amount for various percentages of the cost of the service, and also provides a total amount that includes the tip. This web app was built with the JavaScript framework ReactJS.
